

AI Resume Analysis Report

ATS Score: 67%

Detected Skills: python, c, r, scala, html, css, bootstrap, flask, django, sql, mysql, postgresql, sqlite, scikit-learn, os, teamwork

Recommendations:

Add your GitHub profile link — all service-based companies check it during shortlisting.

Add your LinkedIn profile URL — recruiters at TCS, Infosys, and Accenture actively use it.

No internship found — add any internship or training (even virtual ones from NPTEL, Infosys Springboard, or TCS iON).

Add certifications — AWS Cloud Practitioner, Google IT Support, or Infosys Springboard courses are highly valued by service companies.

Strengthen these core skills that service companies test: java, git, dsa, oops.

Add at least one cloud skill (AWS, Azure, or GCP) — all major IT companies are cloud-first now.

Use strong action verbs in your project descriptions: 'Developed', 'Built', 'Automated', 'Deployed', etc.

Mention your CGPA or percentage — TCS, Infosys, and Wipro have minimum cutoffs (usually 60% or 6.0 CGPA).
